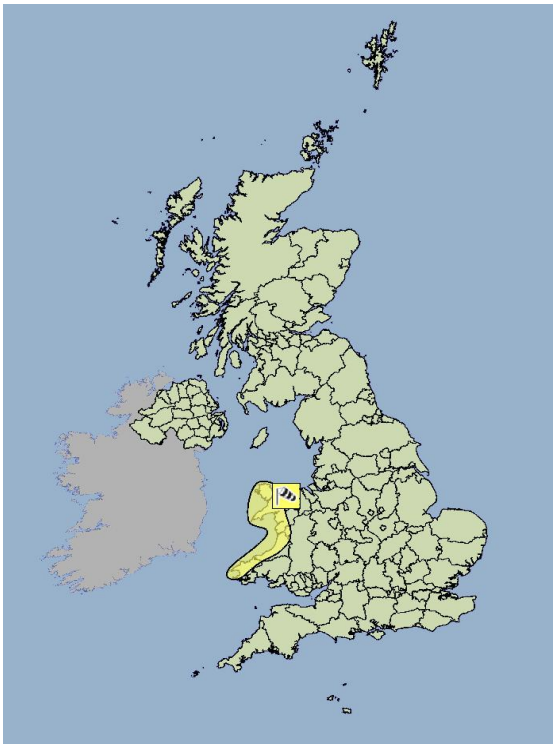
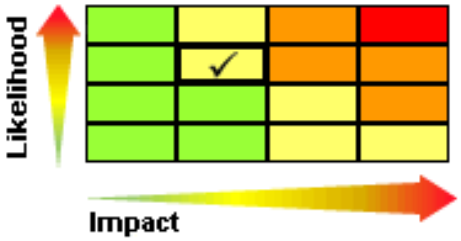
National Severe Weather Warning Service





Chief Forecasters Assessment
While wind gusts of 60 to 75 mph quite often occur across west Wales, the unusual wind direction may add to impacts. This is the type of situation where gusts will vary markedly between nearby places, and through the day.

The Met Office have issued a **Yellow Warning** of **Wind**

Valid from **03:00 on Mon, 13th Feb 2017** until **22:00 on Mon, 13th Feb 2017**

Very strong and gusty easterly winds are expected to affect parts of west Wales on Monday. Gusts to 50 to 60 mph will affect some locations, with possible localised gusts of 70 to 75 mph to the west of mountains. Some disruption to travel, both road and ferries, seems likely.
